

## How to use a GPS Receiver

**Saturday, August 8th, 2009 9:00 a.m. — Noon**  
**Cloquet Forestry Center**  
**\$40 (pre-registration required, call 218-721-3731)**

Learn the basics of using a GPS on a Garmin Map76csx. Once you know the basics you can apply what you learn to operating similar GPS units. You will learn how to find and record waypoints, tracks and measure area. In the afternoon you will have the opportunity to transfer information from the GPS receiver to a computer (see below). We will answer questions about the use of other receivers. Class size is limited to 20.

## An Introduction to Landview for Landowners, Foresters, and Loggers.

**Saturday, August 8th, 2009 12:30-3:30 p.m.**  
**Cloquet Forestry Center**  
**\$30 (pre-registration required, call 218-721-3731)**

After a quick review of how to record waypoints and tracks on your land using a GPS receiver, you will learn how to download them to a computer; and how to lay them over an aerial photo of your land. All you need to bring is an inquisitive mind and a pad for taking notes. You will have the use of a computer and a Garmin 76CSx GPS receiver. The class will be conducted by John Geissler of Boulder Lake Environmental Learning Center. You will find John to be very knowledgeable, enthusiastic about this subject and very patient with computer rookies. Class size is limited to 15.
