

Internship & Practicum Projects

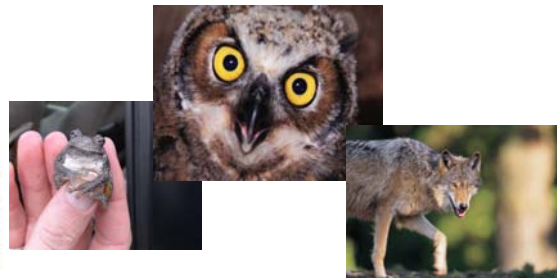

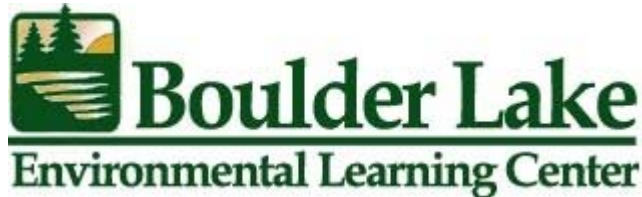

Let Boulder be your next (professional) stepping stone...

Environmental Education

Teach a variety of audiences including...

- K-12
- College
- Professional Development Workshops (for teachers and other professionals)
- Public Programs
- Self-guided programs

Natural Resource Management

A major reason Boulder is so unique for an Internship & Practicum...

- Boulder Lake Management Area encompasses over 14,000 acres of working forest and a 4,000 acre hydropower reservoir. This access to full scale natural resource management is hard to find at other Environmental Learning Centers.
- Partnership between St. Louis County Land Department, MN Power, and MN DNR gives valuable experience with multiple agencies.
- Gain experience with Geographic Information Systems and how they relate to natural resource management

Monitoring and Research

Get involved in monitoring and research. Here are some examples of monitoring activities that have occurred at Boulder...

- Breeding owl survey
- Anuran (amphibian survey)
- Predator survey

For more information visit our website at www.boulderlake.org or call 218-721-3731.
